

3. Japanese laid open patent No. 11-232833, opened August 27, 1999
in the name of Fujitsu Kabushiki Kaisha

[Problems to be Solved]

To provide a cover seal for recording disk drive capable of further reducing noise.

[Means to Solve the Problems]

A cover seal 38 is for covering a cover 30 to confine the cover 30 tightly in a housing body 20. The rigidity of the cover seal 38 is reinforced by a metal foil or a thin resin plate of a multi-layer structure, thereby controlling the chattering of the cover seal 38 caused by air current 45 interacting on the joint of the housing body 20 with the cover 30, thus noise is reduced.

4. Japanese laid open patent No. 11-44362, opened February 16, 1999
in the name of NOK Kabushiki Kaisha

[Problems to be Solved]

To provide a gasket capable of keeping its sealing position and having a good sealing ability by deforming the gasket properly.

[Means to Solve the Problems]

A gasket 1 is arranged in a gap 4. The gasket 1 comprises a sealing portion 1a of the gasket 1 consisting of lips 1a1 and 1a2, a supporting portion 1b extending from the center of the sealing portion 1a in a radial direction and a protruding portion 1c. When the protruding portion 1c is fitted in a groove 2c, the sealing portion 1a is kept at its sealing position.
